Personal Desktop Assistant – Official Documentation

 [Home](#)  [Author](#)

[GB English](#) [IT Italiano](#)

TOC: [The Program](#) [Manuals List](#) [Gallery](#) [Support & Contribute](#)

Welcome!

Explore the official documentation for **myAssistente**. Whether you are a new user or a developer looking to customize the experience, you'll find all the technical references here.

The Program

- **Privacy First:** myAssistente is designed to be your local companion, keeping your data secure and offline whenever possible. 
- **Cross-Platform:** It runs on any OS with Python installed. Ready-to-use packages are available for Windows and Linux. 

Get Started: Download the latest version from the [GitLab Repository](#).

myAssistente: A clean, local, and powerful interface.

How to Contribute

myAssistente is 100% free and open-source. Your support helps keep the project active!

macOS Users: Build and test the distributable packages for Mac.

Translators: Help us bring myAssistente to new languages by editing `lang_it.json` and test the available ones.

Beta Testers: Report bugs or suggest new features on GitLab.

Support my Work

This project is a labor of love developed in my spare time. If you find it useful, consider a small gesture to support future updates!
